

Medical Imaging Sciences

Jacqueline Hernandez

Submitted by Bruce K. Oda

The Medical Imaging Sciences Department is honored to announce Ms. Jacqueline Hernandez as the Outstanding Student, and recipient of the Edward Mallinckrodt Award of Excellence in Radiography for 2023!

Jacqueline moved away from her hometown of Monterey, CA to join the radiography program at SBCC in the summer of 2021. Throughout her time in the program, Jacqueline maintained an accumulative GPA of 3.65. Maintaining her high GPA during the pandemic, with the majority of classes online, has not been an easy feat considering she also performed 1650 hours of clinical internship.

I have witnessed Jacqueline's personal growth. The confidence that has emerged within has enabled her to selflessly provide the highest standard of medical care to the patients she serves. Jacqueline's characteristic qualities of compassion and caring in the service of others, makes her a deserving recipient for this prestigious award.

Upon successful completion on the national board exam, I will be honored referring to Ms. Jacqueline Hernandez as a colleague in our profession with the title of Radiologic Technologist.
